AESTHETIC AND MEDICAL RELIEF
Having varicose veins can be painful and make you feel self-conscious but taking time out to get them treated can feel like a big commitment. That’s why at BMI Healthcare, we offer minimally invasive techniques which means you could get home the same day and be back to normal within a couple of days. We even give you personalised exercise plans and skin care advice to accelerate your recovery.

It’s the little things that make the difference.
VARICOSE VEINS
Varicose veins are common for both men and women and can affect adults of all ages. So if you have varicose veins you are certainly not alone.

You can have your varicose veins treated effectively at a BMI Healthcare hospital. As the UK’s largest private hospital group we have hospitals throughout the UK, so you can choose one that is convenient for you.

We will aim to arrange your treatment around your lifestyle. With several new techniques available, such as laser, VNUS and foam sclerotherapy, you could go home the same day and be back to normal activity within a couple of days. Your specialist will discuss the options available to you during your first consultation.

The first step to treatment is easy. Just call our helpline advisers and they can provide information on the procedures, pricing, consultants and hospitals. They can even book your first appointment for you.

When you come into hospital for your treatment, you will be looked after every step of the way by your consultant and our team of professional nursing staff.

You can be assured of outstanding levels of treatment and care within a clean and comfortable environment.

MAKING AN APPOINTMENT
Our helpline adviser will be able to make an appointment for you at your chosen BMI Healthcare hospital. They will then send you all the necessary details confirming the date and time, together with a map and any other information you need.

If you are insured you may be able to enjoy the benefits of treatment in a BMI Healthcare hospital through your insurance policy. You should seek a referral from your GP to a BMI Healthcare consultant, contact your insurance company to check you are covered, and then contact your local BMI Healthcare hospital to make an appointment.
INITIAL CONSULTATION
With BMI Healthcare your initial consultation will always be with a specialist consultant. At this assessment your consultant will take the time to discuss your health concerns and plan for further diagnostic tests and treatment.

One of the most common diagnostic tests is ultrasound mapping of varicose veins. Your consultant will explain if this test is appropriate for you.

DECIDING TO PROCEED TO TREATMENT
Varicose vein treatment from BMI Healthcare can remove or disable varicose veins using traditional surgery or laser treatment.

Whichever treatment is required, once you have decided to proceed, you will be provided with a written quote, clearly explaining what is included in the price. As we believe your safety and well-being should always come first, we will not recommend surgery or treatment if it isn’t appropriate for you.
YOUR LOCAL BMI HEALTHCARE HOSPITAL

SPREAD THE COST USING THE BMI CARD†

Think you can’t afford to go private? With BMI Healthcare you can.

Spread the cost of your treatment with 12 months’ interest free credit – representative 9.9% APR (variable) thereafter.

Choose a credit limit that suits your circumstances up to £20,000 (subject to status) and use as often as you need to. Safe in the knowledge you’ll enjoy 12 months’ interest free credit every time you make a purchase.

For more information, full terms and conditions or to apply, you can call us on 0161 216 2500 (select option 1 and then option 2), visit us at www.bmihealthcare.co.uk/bmicard or speak to us at your local BMI Healthcare hospital.

†BMI Card is a credit facility offered by BMI Healthcare Limited, BMI Healthcare House, 3 Paris Garden, London, SE1 8ND. 0% interest for 12 months then 0.79% per month, representative 9.9% APR variable.
