

Carrick Glen  
Hospital

# DIRECTORY OF CONSULTANTS 2020

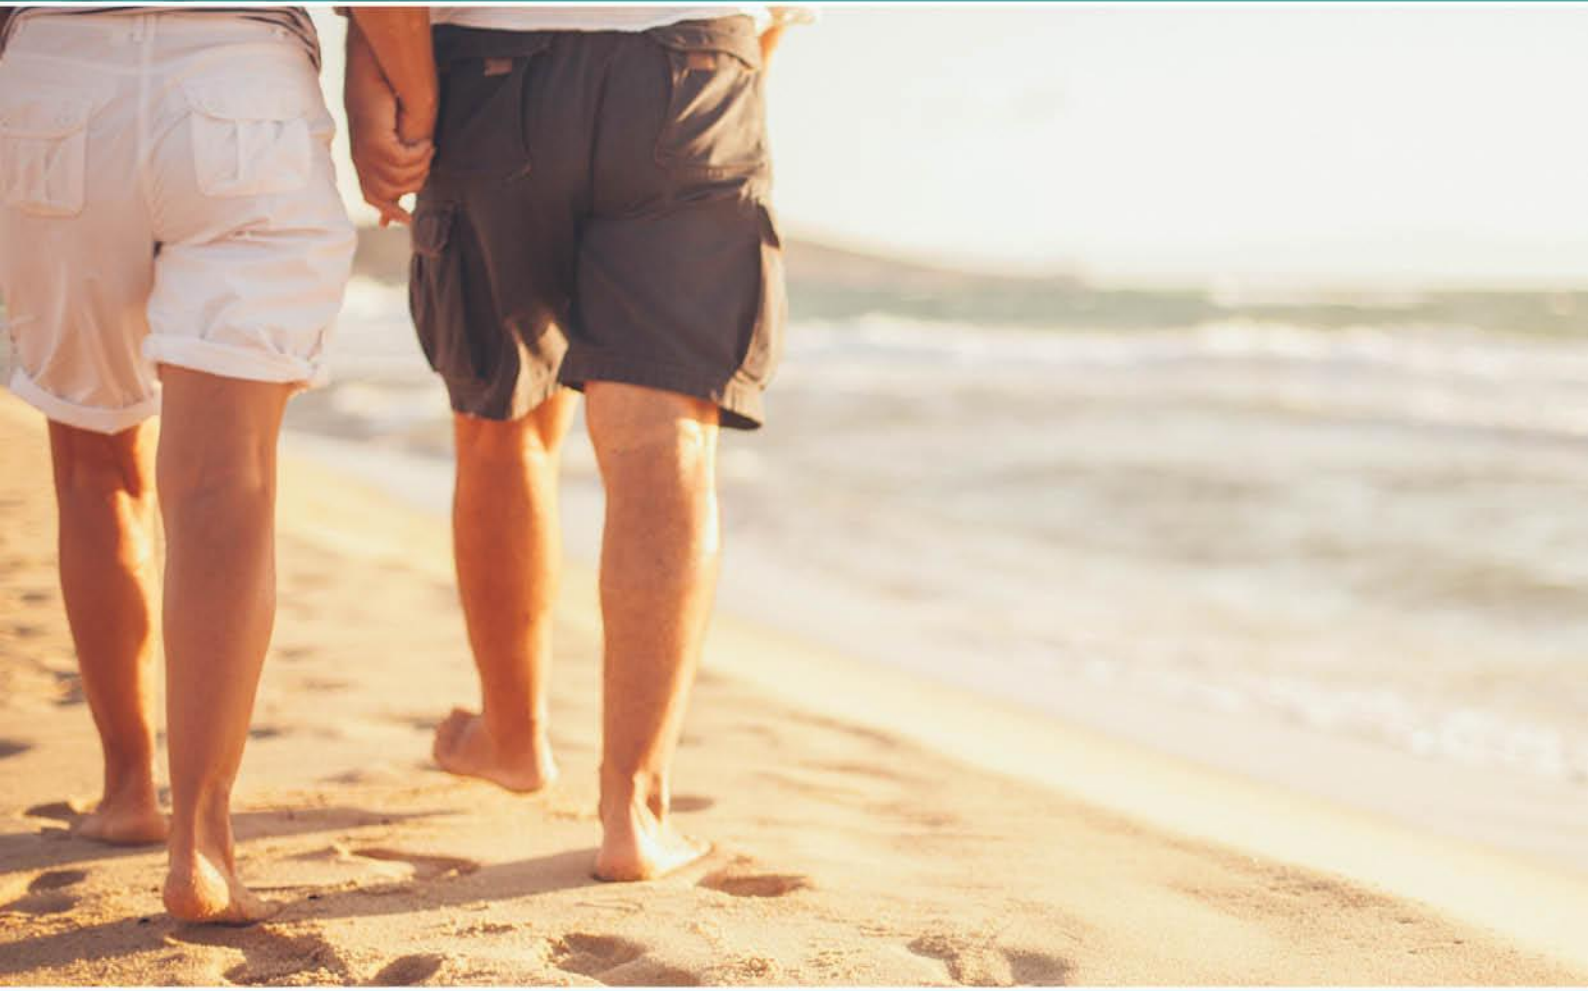

BMI Carrick Glen Hospital

BMI Carrick Glen Hospital is an outpatient and minor procedure facility. We provide patients with a full physiotherapy service including sports injury clinic. Our comprehensive diagnostic imaging department offers x-ray and ultrasound and we have six consulting rooms including dedicated ENT and ophthalmic rooms.

Our experienced Consultants work across a range of specialities for which we see patients for initial and follow up appointments. Where a patient requires surgery as a day case or inpatient, they will attend our sister hospital BMI Ross Hall Hospital in Glasgow.

## Varicose Vein Treatments

At BMI Carrick Glen Hospital we are pleased to work in partnership with the Ayr Vein Clinic to offer a range of varicose vein treatments carried out by Consultant Vascular Surgeon, Mr Stephen Kettlewell.

The majority of the varicose vein treatments carried out at the hospital are minimally invasive and are performed under local anaesthetic. This helps to minimise bruising, improve patient comfort and reduce recovery time allowing patients to return to work and normal activities as quickly as possible.

The treatments carried out are provided in line with NICE guideline (CG168) and include ultrasound guided foam sclerotherapy (UGFS), radiofrequency ablation (RFA), varicose veins surgery and thread vein sclerotherapy.

# New Consultants

Due to ongoing service expansions, we have a number of new Consultants at the hospital offering a wide range of specialties. We understand the importance of providing a local service to the Ayrshire community and ensuring we continue to recruit new professionals across specialties will enable us to provide a fully comprehensive private outpatient service. Our team of consultants see new patients on both an insured and self-pay basis.
