General Surgery Services

At BMI Kings Park Hospital we have a number of Consultant General Surgeons who can help treat a variety of conditions including colorectal and intestinal issues, acid reflux, IBD, IBS, hernias and gallbladder problems.

Our surgeons use minimally invasive surgery where possible, to ensure patients endure less scarring, shorter recovery times and improved outcomes and we have an Endoscopy Department where colonoscopies and gastroscopies are carried out in order to investigate problems more closely.

GENERAL SURGERY							
Mr J Camilleri-Brennan	Colorectal and laproscopic surgery, incontinence and prolapse surgery, inflammatory bowel disease, haemorrhoids, gall bladder disease	pm				eve

Mr C Shearer	Bariatric surgery, general surgery, cancer of the oesophagus/stomach, endoscopy, laparoscopic cholecystectomy, hernia surgery		am			pm	

Dundee Outpatient Centre

We are delighted to be working in partnership with Heal Physiotherapy to provide outpatient clinics for the Dundee and Tayside community who wish to receive private healthcare advice and treatment.

The new outpatient centre based within Heal Physiotherapy's facility at Dudhope Street in Dundee city centre provides new and follow up outpatient appointments across a range of specialties, with these clinics being delivered by locally based consultant surgeons.

To provide Dundee and Tayside with a fully comprehensive local pathway we are also working with the University of Dundee to provide local MRI and CT scans at their dedicated clinical research centre as well as Kings Cross Hospital Radiology Department for X-Ray.

Our team of consultants see new patients for any orthopaedic, neuro, urological, plastic, general or colorectal conditions.
