

Group Chief Executive's Statement

These are the BMI Healthcare Quality Accounts for 2017, providing a transparent picture of performance and outcomes of objective metrics on the quality of our 59 hospitals and clinics across the UK.

We have made a significant investment in our hospitals over the course of the year. We have installed new diagnostic equipment, such as MRI and CT scanners, new endoscopy decontamination units and digital mammography. We have also enhanced our services and hospital facilities and are pleased that our cancer centres are achieving Macmillan Quality Environment Marks. Similarly, those hospitals with endoscopy services are working towards achieving Joint Advisory Group (JAG) accreditation, showing they adhere to the highest standards.

Our commitment to developing BMI as a leader in digital healthcare has already seen the introduction of e-prescribing across our cancer centres, with everyone involved in a patient's care able to access set tumour protocols and real-time information to inform prescribing decisions. Our planned future investment in an electronic patient record has the same aim – to streamline information, ensure this is available to clinicians, reduce duplication and support good systems for patient safety across the entire patient journey.

Quality underpins everything that we do; whether that is in direct patient care or in the systems and processes that we have to promote safe and effective health outcomes. These two aspects of our hospitals work hand in hand, and getting that right is an essential part of our quality agenda.

All our hospitals have now been assessed by the regulator for their country. The Care Quality Commission has published the findings of its inspections of our hospitals in England, assessing them on the five standard criteria of safe, well-led, responsive, caring and effective. We are pleased that the CQC agreed that our staff provide a good level of care across our hospitals and also noted areas of exemplary healthcare in other criteria. Health Improvement Scotland and the Health Inspectorate Wales also highlighted our hospitals in those countries as providing good and very good levels of healthcare.

Ours is a learning organisation, and while we were proud of those areas where we had performed well, we place equal importance on areas where the inspectors said we needed to focus and improve. We invited the CQC to present their thoughts to all our registered managers, so that we can work collaboratively and effectively on issues that may be common to more than one hospital. And our registered managers are also sharing best practice across our network with a process of peer review. Our focus for our hospitals is to work towards the next highest rating in the cycle of regulatory inspections.

Over the course of the year we have brought all our audit processes together into a comprehensive integrated audit programme which covers both clinical and commercial. This will provide a clear overview of status at local hospital level and at Board level. We have put in standard committee structures to improve our governance and standardise management of all parts of the business as well as provide opportunities for staff in all areas to continue their innovative ideas for the benefit of our whole hospital network.

We look both prospectively and retrospectively in identifying and mitigating risks and promote a responsible culture where we are confident to challenge when we see something does not appear correct. Working in this way means we can identify and implement mechanisms and strategies to address risks.

All our hospitals across the BMI Healthcare network are committed to our brand promise to be “serious about health, passionate about care” and its four key themes of safety, clinical effectiveness, patient experience and quality assurance. Our patients agree that we achieve this, with 98.4% agreeing that the quality of their care was very good or excellent. In addition, 98.4% say that they would recommend one of our hospitals to their family and friends. These figures reflect the opinions of patients who select us for their NHS-funded care, of those covered by private medical insurance and of those who choose to pay for their own care.

Our learning culture extends throughout our support, clinical, nursing and medical staff and Consultants. We have adopted new approaches to ‘human factor’ training, building on approaches to minimising risk which have been developed in the airline industry. We have also embedded training and understanding around Duty of Candour, the responsibility we have to explain to patients that might have led to treatment with undesirable outcomes, and a network of Candour Champions.

The information available here in the Quality Accounts has been reviewed by the BMI Healthcare Clinical Governance Committee and I declare that, as far as I am aware, the information contained in these reports is accurate.

I would like to extend my thanks to staff throughout BMI Healthcare whose dedication, experience and expertise has led to the positive outcomes highlighted in this report. Everyone, whether a member of our ground care staff, nursing team, diagnostic departments, contact centre or a part of our corporate teams, all shares the same aim - to provide quality care and an exceptional experience for our patients.

Jill Watts, Group Chief Executive

Hospital Information

BMI Kings Park Hospital is located in Stirling, and is part of BMI Healthcare, the largest independent healthcare provider in the UK.

A wide range of surgical procedures are carried out from routine investigations to complex surgery including major joint replacements. Over 80 Consultants have Practising Privileges and they receive support from a Resident Medical Officer.

The hospital has 21 en-suite patient bedrooms with are fitted with remote controlled flat screen television and telephone facility.

The hospital has 2 operating theatres, one with laminar airflow to assist in the prevention of infection.

The specialties the hospital offers are as follows:

- Outpatient services
- Cardiology
- Gastroenterology
- Clinical Psychology

- Cosmetic
- Dermatology
- Ear, nose and throat
- General Surgery
- Urology
- Gynecology
- Vascular (Varicose Vein Treatment)
- Neurosurgery (Spinal Procedures)
- Ophthalmology
- Endoscopy
- Physiotherapy
- Diagnostic Imaging
- Facial maxillary

In the last year the hospital has developed a new specialty service: Neurosurgery and Pain Management with a team of 3 specialty NHS based Consultants who provide a wide range of spinal surgery and pain management procedures.

The hospital has benefited from the installation of a new state of the art Fire Alarm and Nurse Call system this year.

BMI Healthcare are registered as a provider with the Care Quality Commission (CQC) under the Health & Social Care Act 2008 as well with the Hospital Improvement Scotland (HIS) and Healthcare Inspectorate Wales (HIW) for our hospitals outside of England. BMI Kings Park Hospital is registered as a location for the following regulated services:-

- Treatment of disease, disorder and injury
- Surgical procedures
- Diagnostic and screening
-

These regulatory bodies carry out inspections of our hospitals periodically to ensure a maintained compliance with regulatory standards.

HIS carried out an unannounced inspection on 1st and 2nd of February 2017 and found the Hospital scored as follows:

Quality of Information: 4

Quality of Care and Support: 4

Quality of Environment: 4

Quality of Staffing: 4

Quality of Management and Leadership: 5

The table below outlines the ratings system:

Excellent	Very Good	Good	Adequate	Weak	Unsatisfactory
6	5	4	3	2	1

Kings Park Hospital has a local framework through which clinical effectiveness, clinical incidents and clinical quality is monitored and analysed. Where appropriate, action is taken to continuously improve the quality of care. This is through the work of a multidisciplinary group and the Medical Advisory Committee.

At a Corporate Level, BMI Healthcare's Clinical Governance Board has an overview and provides the strategic leadership for corporate learning and quality improvement.

There has been ongoing focus on robust reporting of all incidents, near misses and outcomes. Data quality has been improved by ongoing training and database improvements. New reporting modules have increased the speed at which reports are available and the range of fields for analysis. This ensures the availability of information for effective clinical governance with implementation of appropriate actions to prevent recurrences in order to improve quality and safety for patients, visitors and staff.

At present we provide full, standardised information to the NHS, including coding of procedures, diagnoses and co-morbidities and PROMs for NHS patients. There are additional external reporting requirements for CQC/HIS/HIW, Public Health England (Previously HPA) CCGs and Insurers

BMI Healthcare is a founding member of the Private Healthcare Information Network (PHIN) UK – where we produce a data set of all patient episodes approaching HES-equivalency and submit this to PHIN for publication.

This data (once PHIN is fully established and finalised) will be made available to common standards for inclusion in comparative metrics, and is published on the PHIN website <http://www.phin.org.uk>.

This website gives patients information to help them choose or find out more about an independent hospital including the ability to search by location and procedure.

Safety

Infection Prevention and Control

The focus on Infection Prevention and Control continues under the leadership of the Group Head of Infection Prevention and Control, in liaison with the link nurse in Kings Park Hospital.

The focus on Infection Prevention and Control continues under the leadership of the Group Director of Infection Prevention and Control and Group Head of Infection Prevention and Control, in liaison with the Infection Prevention and Control Lead.

Between April 2016 to March 2017, the hospital had:

- Zero MRSA bacteraemia cases/100,000 bed days
- Zero MSSA bacteraemia cases /100,000 bed days
- Zero E.coli bacteraemia cases/ 100,000 bed days
- 0 of cases of hospital apportioned Clostridium difficile in the last 12 months.

- SSI data is also submitted to Health Protection Scotland for Orthopaedic surgical procedures. Our rates of infection are zero SSI for Hip or Knee replacements carried out in the last year.

BMI Kings Park has an annual program of Infection Prevention and Control Audits which cover each department of the Hospital. Where appropriate action plan developed and implemented to address any areas of concern of non-compliance. Risk assessments are in place for any environmental issues which are not financially viable to address in the short/medium term e.g. replacement of all wash hand basins. The audits are as follows:

- Departmental Hand Hygiene Audit
- Annual Departmental Environmental Audit
- High Impact Care Bundles (intravenous cannulation, hand hygiene and surgical site infection implemented in 2015)
- Patient mattress audits
- Standards of Housekeeping Audits

BMI Kings Park Hospital participates in a corporate mandatory staff training program directly related to Infection Prevention and Control including the following elements and has 100% compliance rate:

Aseptic Non-Touch Technique training

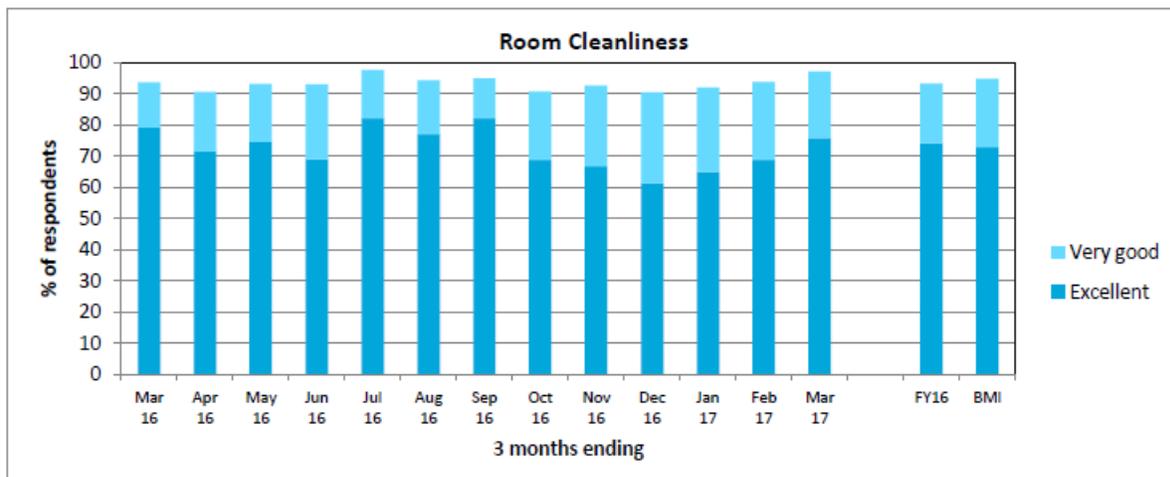

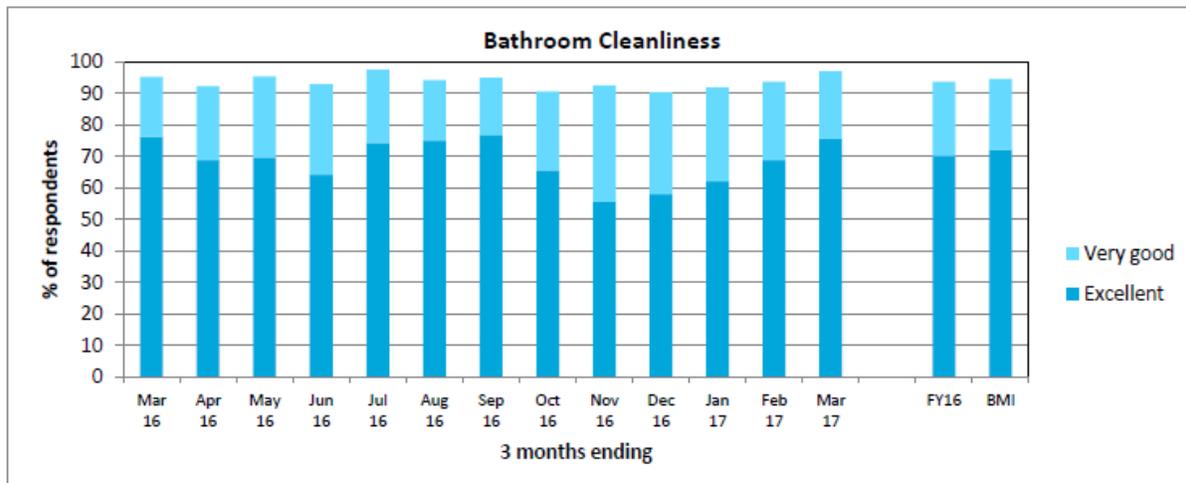

Hand Hygiene Training

Our lead IPC Nurse on site is currently being supported to complete her BSc in Infection Prevention and Control.

Include any focused activities on hand hygiene, aseptic non touch technique and other infection prevention activities.

Environmental cleanliness is also an important factor in infection prevention and our patients rate the cleanliness of our facilities highly.

92% of patients scored Kings Park Hospital bathroom and bedroom cleanliness as excellent or very good.

Duty of Candour

A culture of Candour is a prerequisite to improving the safety of patients, staff and visitors as well as the quality of Healthcare Systems.

Patients should be well informed about all elements of their care and treatment and all staff have a responsibility to be open and honest. This is even more important when errors happen.

As part of our Duty of Candour, we will make sure that if mistakes are made, the affected person:

- Will be given an opportunity to discuss what went wrong.
- What can be done to deal with any harm caused.
- What will be done to prevent it happening again.
- Will receive an apology.

To achieve this, BMI Healthcare has a clear policy - BMI Being Open and Duty of Candour policy.

We are undertaking a targeted training programme for identified members of staff to ensure understanding and implementation in relation to the Duty of Candour.

Venous Thrombo-embolism (VTE)

BMI Healthcare, holds VTE Exemplar Centre status by the Department of Health across its whole network of hospitals including Kings Park Hospital. BMI Healthcare was awarded the Best VTE Education Initiative Award category by Lifeblood in February 2013 and was the Runners up in the Best VTE Patient Information category.

We see this as an important initiative to further assure patient safety and care. We audit our compliance with our requirement to VTE risk assessment every patient who is admitted to our facility and the results of our audit on this has shown no recorded cases of patients developing VTE post-surgery during the period 1st April 2016 – 31st March 2017.

Kings Park Hospital reports the incidence of Venous Thromboembolism (VTE) through the corporate clinical incident system. It is acknowledged that the challenge is receiving information for patients who may return to their GPs or other hospitals for diagnosis and/or treatment of VTE post discharge from the Hospital. As such we may not be made aware of them. We continue to work with our Consultants and referrers in order to ensure that we have as much data as possible. .

Sign Up for Safety Campaign

In December 2015 BMI Health applied to Sign up for Safety by submitting our actions for the following five pledges:

- **Put safety first** – Committing to reduce avoidable harm in the NHS by half through taking a systematic approach to safety and making public your locally developed goals, plans and progress. Instill a preoccupation with failure so that systems are designed to prevent error and avoidable harm
- **Continually learn** – Reviewing your incident reporting and investigation processes to make sure that you are truly learning from them and using these lessons to make your organisation more resilient to risks. Listen, learn and act on the feedback from patients and staff and by constantly measuring and monitoring how safe your services are
- **Be honest** – Being open and transparent with people about your progress to tackle patient safety issues and support staff to be candid with patients and their families if something goes wrong

- **Collaborate** – Stepping up and actively collaborating with other organisations and teams; share your work, your ideas and your learning to create a truly national approach to safety. Work together with others, join forces and create partnerships that ensure a sustained approach to sharing and learning across the system
- **Be supportive** – Be kind to your staff, help them bring joy and pride to their work. Be thoughtful when things go wrong; help staff cope and create a positive just culture that asks why things go wrong in order to put them right. Give staff the time, resources and support to work safely and to work on improvements. Thank your staff, reward and recognise their efforts and celebrate your progress towards safer care.

BMI Healthcare as a company was successful in their application with Sign up for Safety in March 2016. Sign up for safety is a campaign to make all our healthcare services the safest in the world. Whilst predominantly focused on the NHS the campaign welcomes independent healthcare companies or individual hospitals to participate to make all healthcare services safer. The ambition of sign up to safety is to halve avoidable harm over the next three years and save 6,000 lives as a result. By signing up to the campaign we have committed to listening to patients, carers and staff, learning from what they say when things go wrong and taking action to improve patient's safety helping to ensure patients get harm free care every time, everywhere.

Risk Management System

In December 2016, BMI Healthcare changed its Risk Management System. **RiskMan** is now used across the company, within 70 different locations for the capturing of:

- Events (Incidents & Expected Patient Deaths)
- Feedback (Complaints, Queries & Compliments)
- Risks
- Legal Claims

During 2017, further modules will be introduced which include a Safety Alerts functionality, a Policy Library and also a dedicated CQC module which BMI Healthcare will be tailoring to the very specific nature of CQC Inspections and Key Lines of Enquiry (KLOEs).

The change of system has been met with unanimous support across the company, allowing for faster and easier incident entry and much improved reporting capabilities. The change of Risk Management System has seen around a 50% increase in incident reporting on the whole and a significant change of reporting culture is being felt across the company as a result.

With the change of Risk Management System, BMI Healthcare has also taken the opportunity to revisit its incident and complaint processes and policies in order to improve these in line with the new system.

The system is available to all BMI Healthcare employees at point of entry leading to much swifter incident investigations, action completion and closure.

Risk Registers

As part of the implementation of a new Risk Management System, RiskMan, BMI worked diligently to implement a new Risk Register process within all of its hospitals that strengthened the approach to managing risk and responded to feedback from the CQC.

This new process allows for greater transparency of risks across all levels, from department to hospital to corporate risks. RiskMan allows for improved risk monitoring and overview, ensuring that Heads of Department & Senior Management Teams are supported to discuss risk at relevant committees and meetings with readily available information and reports.

The Executive team and Governance Committee identified risks which affect BMI Healthcare and from these risks a subset was identified that cascaded to hospitals. This ensures that organisation risks and strategies to mitigate these are monitored and actioned across all hospitals. It also allows hospitals to identify department and site specific issues and how these affect both the hospital and the overall strategic objectives of the company as a whole.

Reducing the requirement for paper versions of Risk Registers, RiskMan holds all Corporate, Hospital & Departmental Risk Registers in the system so that they are accessible easily by hospital and corporate staff for reviewing as appropriately.

Having worked closely with the CQC on this process, BMI Healthcare has received encouraging feedback on this approach from both an internal and external level and continues to implement this new way of working across its hospitals

Enhanced Recovery Programme (ERP)

The ERP is about improving patient outcomes and speeding up a patient's recovery after surgery. ERP focuses on making sure patients are active participants in their own recovery and always receive evidence based care at the right time. It is often referred to as rapid recovery, is a new, evidence-based model of care that creates fitter patients who recover faster from major surgery. It is the modern way for treating patients where day surgery is not appropriate.

ERP is based on the following principles:-

1. All Patients are on a pathway of care
 - a. *Following best practice models of evidenced based care*
 - b. *Reduced length of stay*
2. Patient Preparation
 - a. *Pre Admission assessment undertaken*
 - b. *Group Education sessions*
 - c. *Optimizing the patient prior to admission – i.e HB optimisation, control co-morbidities, medication assessment – stopping medication plan.*
 - d. *Commencement of discharge planning*
3. Proactive patient management
 - a. *Maintaining good pre-operative hydration*
 - b. *Minimising the risk of post-operative nausea and vomiting*
 - c. *Maintaining normothermia pre and post operatively*
 - d. *Early mobilisation*
4. Encouraging patients have an active role in their recovery
 - a. *Participate in the decision making process prior to surgery*
 - b. *Education of patient and family*
 - c. *Setting own goals daily*
 - d. *Participate in their discharge planning*

Kings Park Hospital has fully embraced and embedded the ERP and has reduced overall length of stay in 2015 to 1.32 days.

Unplanned Readmissions & Unplanned Returns to Theatre.

Unplanned readmissions and Unplanned Returns to Theatre are normally due to a clinical complication related to the original surgery. In 2016 Kings Park Hospital had a rate of 0.186 per 100 cases returned to theatre which is in line with the company average.

Patient Experience

Patient Satisfaction

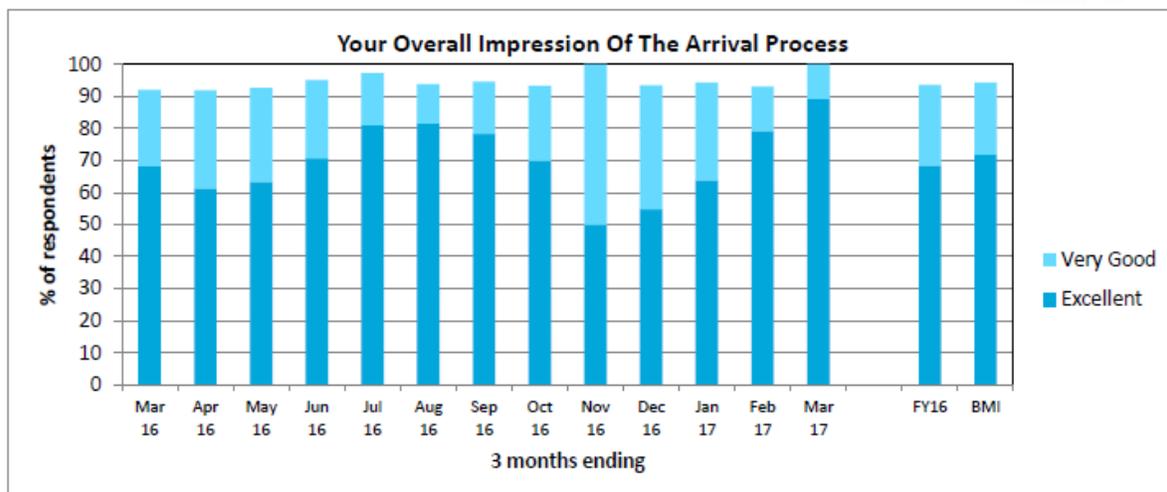

BMI Healthcare is committed to providing the highest levels of quality of care to all of our patients. We continually monitor how we are performing by asking patients to complete a patient satisfaction questionnaire. Patient satisfaction surveys are administered by an independent third party.

BMI Kings Park Hospital continually review our patient satisfaction survey results to establish where we have the potential to improve on the outcomes and experience for our patients. This process is carried out at our local Hospital Clinical Governance and Lessons Learned Meetings.

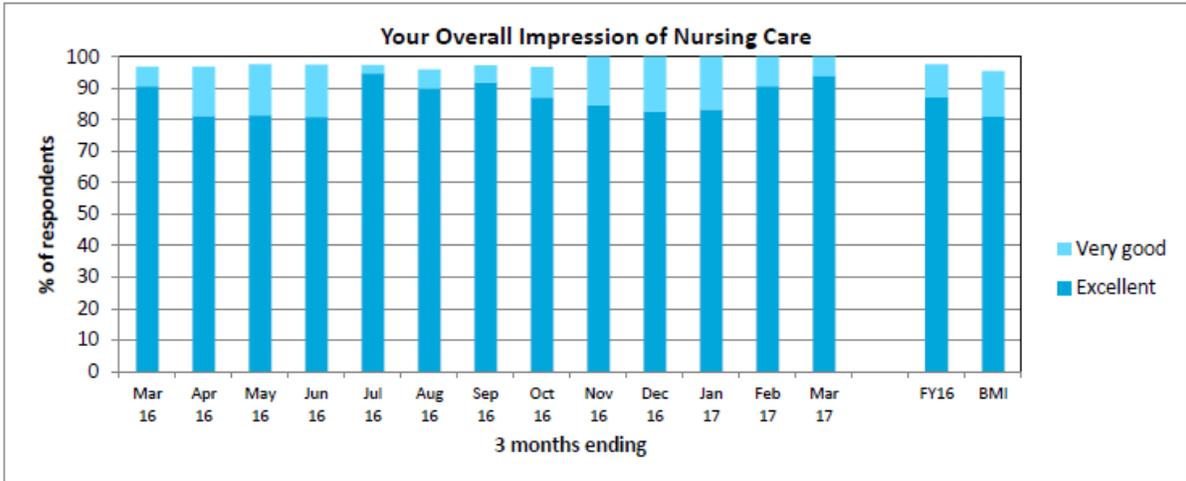

92% - 100% of patients said that Kings Park Hospital exceeded or met their expectations.

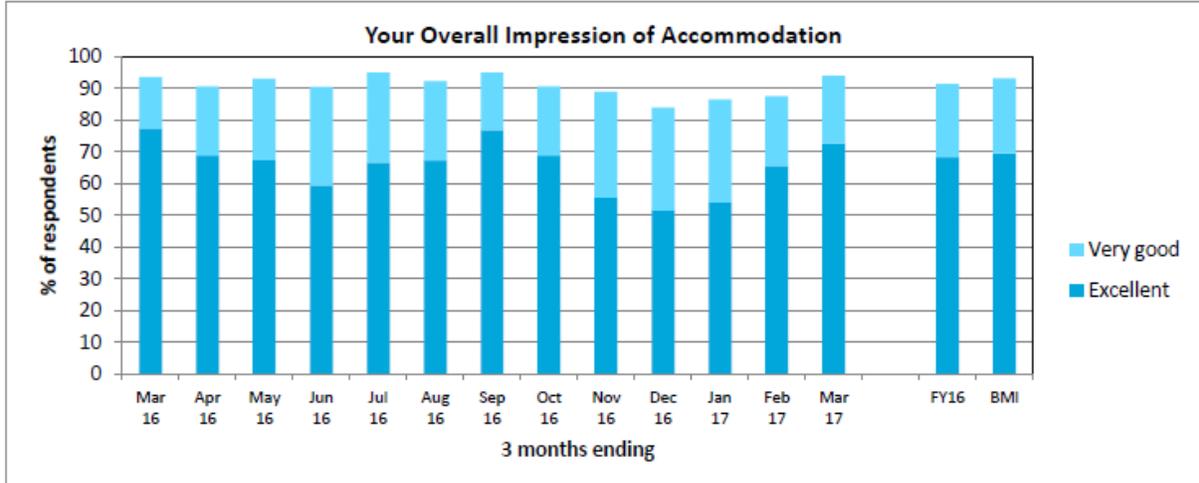

92-100% of patients rated the arrival process at Kings Park excellent or very good.

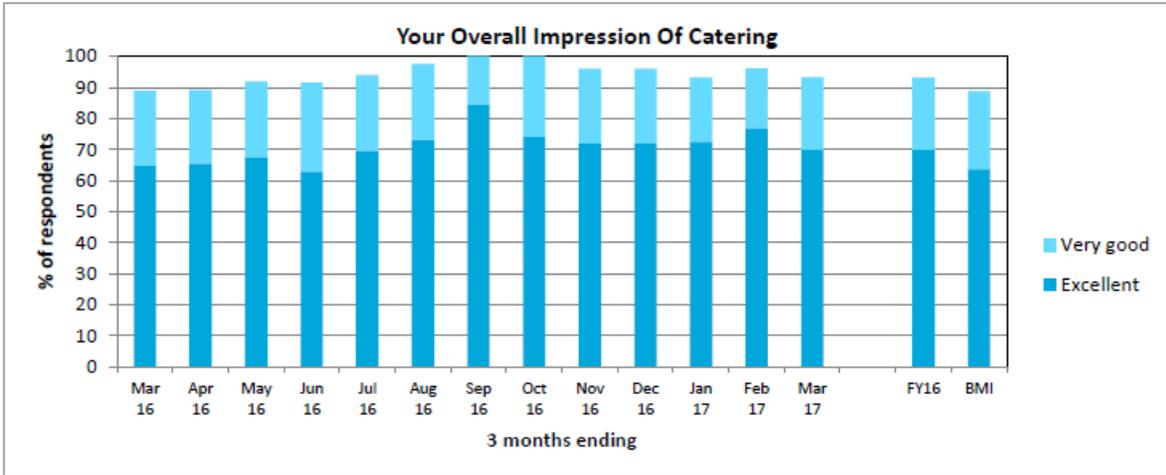

95-100% of patients said the nursing care at Kings Park Hospital was excellent or very good. This is a slightly higher than the BMI company overall score.

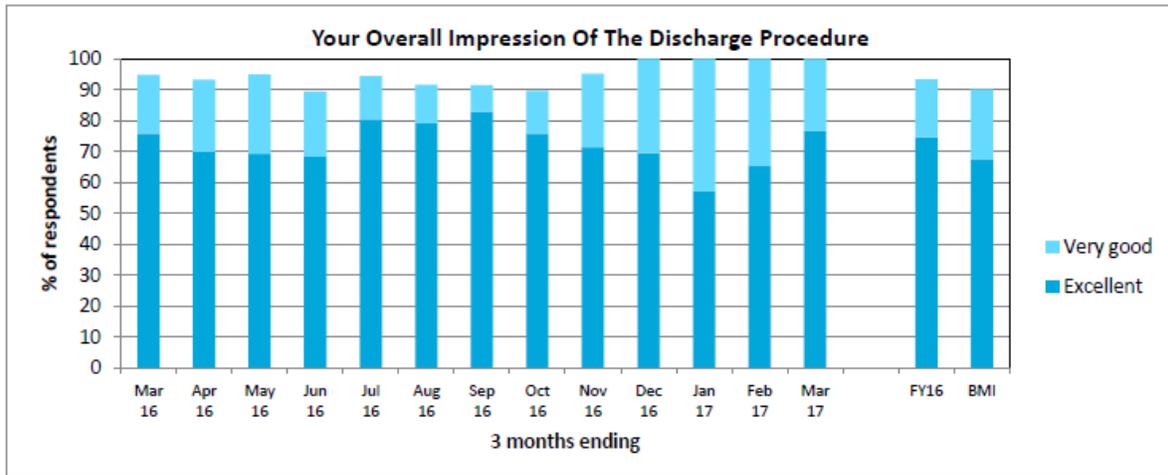

82-95% of patients said the accomodation at Kings Park was very good or excellent. The hospital has an ongoing programme of refurbishment as we want to improve the accomodation and patienn experience.

92-100% of patients said the catering was very good or excellent.

90-100% of patients said the discharge procedure at Kings Park was very good or excellent. The hospital is continually reviewing the discharge process to improve the patient experience, using “you said we did”.

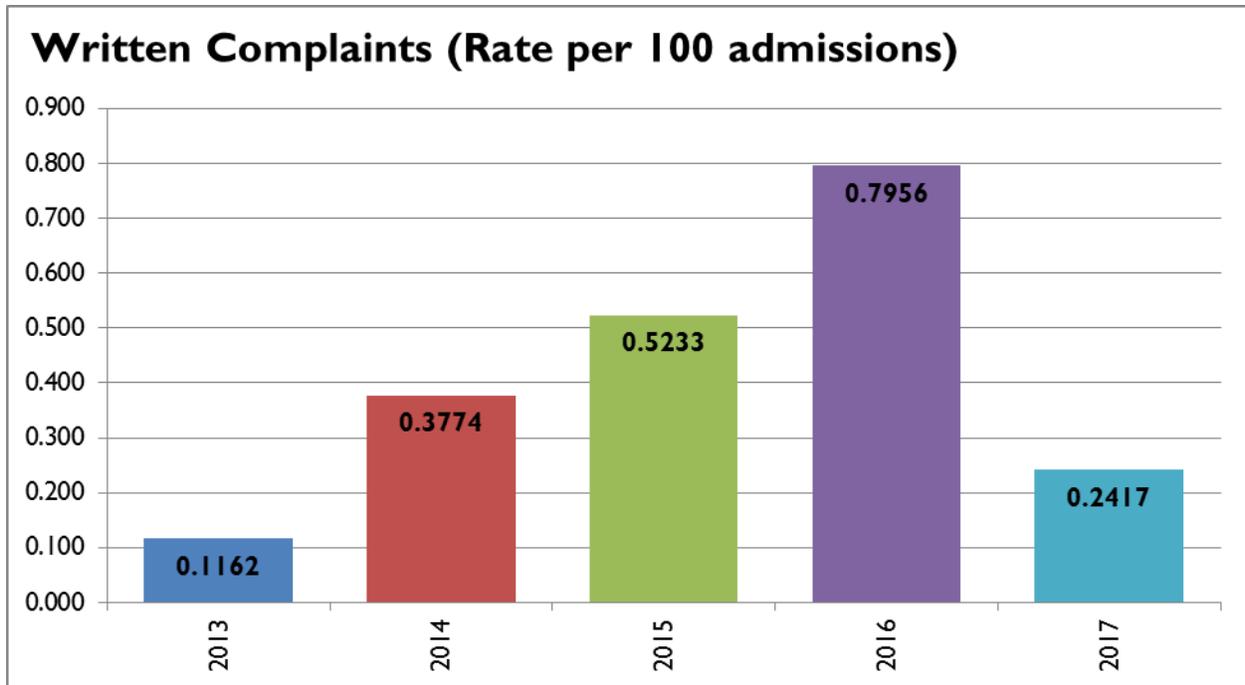

Complaints

In addition to providing all patients with an opportunity to complete a Satisfaction Survey BMI Kings Park actively encourages feedback both informally and formally. Patients are supported through a robust complaints procedure, operated over three stages:

Stage 1: Hospital resolution

Stage 2: Corporate resolution

Stage 3: Patients can refer their complaint to Independent Adjudication if they are not satisfied with the outcome at the other 2 stages.

Although Kings Park Hospital had a slight increase in the level of written complaints in 2016, the overall rate of complaints remains low with main theme being related to billing errors. At Kings Park Hospital we continually work to resolve any issues highlighted in complaints and develop and implement action plans to avoid recurrence and improve quality.

Safeguarding

Safeguarding is about protecting people from abuse; prevent abuse from happening and making people aware of their rights. To enable us to do this better training has been enhanced and made available for staff and consultants within the hospital

Adult abuse can happen to anyone over the age of 18 years of age and within BMI our staff are trained to adult safeguarding level 2, so they can identify, support and advise anyone who requires it.

Adult safeguarding level 3 is provided to senior members of the team to ensure that appropriate.

Children and Young people abuse can happen to any person 18 years old or below and to ensure that that all children and young peoples are looked after appropriately all our clinical staff including consultants are trained to Level 3 children’s safeguarding our other staff members are trained to level 2.

Senior registered Nurses are trained to level 4 safeguarding (if applicable)

Kings Park Hospital has had no safeguarding issues logged in 2016.

VTE Exemplar Status

BMI Healthcare holds VTE Exemplar Centre status by the Department of Health across its whole network of hospitals including Kings Park Hospital. BMI Healthcare was awarded the Best VTE Education Initiative Award category by Lifeblood in February 2013 and was the Runners up in the Best VTE Patient Information category.

We see this as an important initiative to further assure patient safety and care. We audit compliance with our requirement to VTE risk assessment every patient who is admitted to the hospital. Kings Park Hospital reports the incidence of Venous Thromboembolism (VTE) through the corporate clinical incident system. It is acknowledged that the challenge is receiving information for patients who may return to their GPs or other hospitals for diagnosis and/or treatment of VTE post discharge from the Hospital. As such we may not be made aware of them. We continue to work with our Consultants and referrers in order to ensure that we have as much data as possible.

Antimicrobial Stewardship

Antimicrobial guidelines are in use across the hospital which details the medication to be used in clinical situations.

BMI Healthcare's Safer Surgery Commitment

BMI Healthcare commissioned an external review of Never Events that had taken place across the business in 2015/16. In response to these key findings, BMI Healthcare has developed a 'Safe Surgery Commitment', as a commitment to ensure we are safe, effective, responsive, caring and well-led provider of healthcare. The 'Safer Surgery Commitment' incorporated the National Safety Standards for Invasive Procedures (NatSSIPs) and was developed in conjunction with the Theatre Managers to ensure practitioner involvement.

The main areas for commitment are:

1. Strengthen corporate safety management systems
2. Policy review
3. Improve incident investigation reports
4. Reward staff for safety
5. Build resilience into theatre teams, including action to mitigate the risks associated with non-substantive and novice staffing
6. Address reasons for non-concordance

Progress has been measured against the standards and each site has recently undertaken a review of the implementation of the 'Safer Surgery Commitment' to ensure these have been implemented.

National Clinical Audits

BMI Kings Park was not involved in National Clinical Audits during the year 1st April 2016 to 1st April 2017.

Priorities for Service Development and Improvement

This year the priorities for Kings Park Hospital for Service Development and Improvement include the following:

- To develop and implement a model of medical admissions. This is a corporate project which Kings Park Hospital will participate in.
- Continue to work closely with our Consultants and Marketing Team to drive forward the neurosurgery (spinal) and pain management service during 2017/18
- Have an ongoing refurbishment plan which is closely aligned to the feedback from our monthly patient satisfaction survey (Quality Health). This information allows us to develop our service in collaboration with our patients. This includes the ongoing upgrading of patient rooms.
- Continue to liaise closely with our local NHS Trust Hospital in a bid to assisting them in meeting their targets related to the 18 week RTT and Patients' Rights Bill if they require us to do so.

Quality Indicators

The below information provides an overview of the various Quality Indicators which form part of the annual Quality Accounts. Where relevant, information has been provided to explain any potential differences between the collection methods of BMI Healthcare and the NHS.

All data provided by BMI Healthcare is for the period **April 2016-March 2017** to remain consistent with previous Quality Accounts, whilst the NHS data may not be for the same period due to HSCIC data availability. The NHS data provided is the latest information available from the HSCIC Indicator Portal.

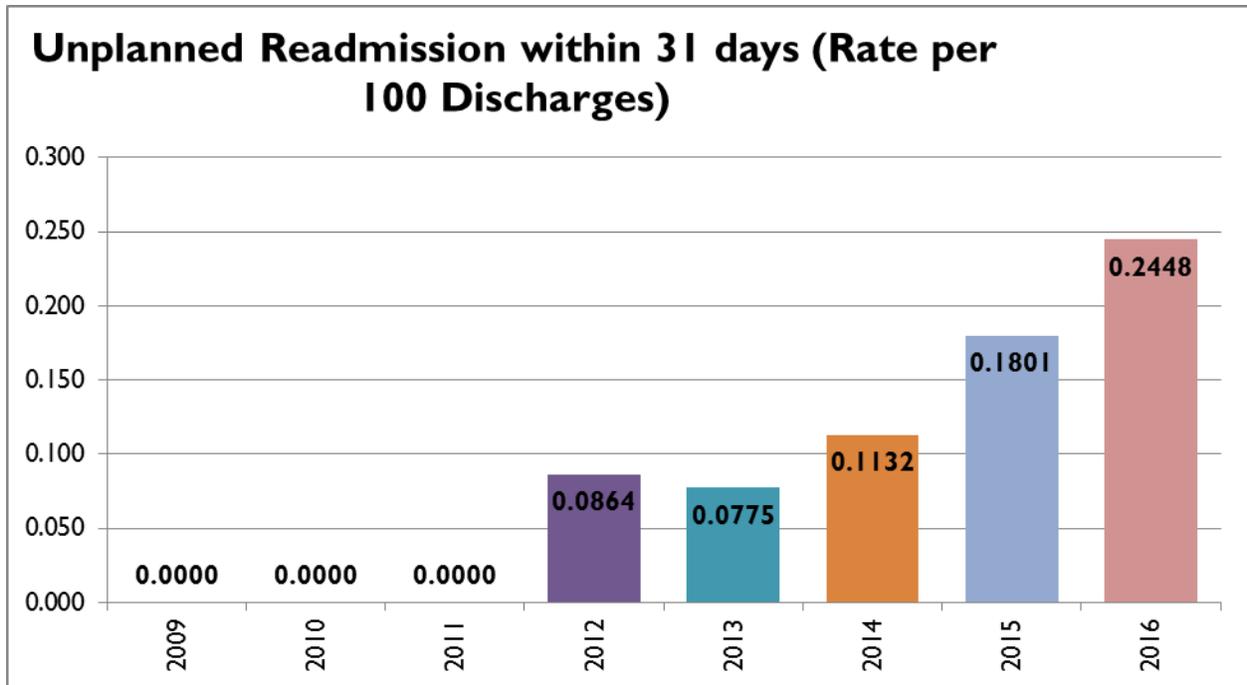

Indicator	Source	Information	NHS Date Period
Summary Hospital-Level Mortality Indicator (SHMI)	This indicator measures whether the number of patients who die in hospital is higher or lower than would be expected. This indicator is not something that is collected for the Independent Healthcare Sector.		
Number of paediatric patients re-admitted within 28 days of discharge and number of adult patients (16+) re-admitted within 28 days of discharge.	BMI Healthcare Risk Management System*	This figure provided is a rate per 1,000 amended discharges.	2011-2012
Percentage of BMI Healthcare Staff who would recommend the service to Friends & Family	BMI Healthcare Staff Survey		NHS Staff Survey 2016

Number of <i>C.difficile</i> infections reported	BMI Healthcare Risk Management System*	This indicator relates to the number of hospital-apportioned infections.	April 2014 – March 2015
Responsiveness to Personal Needs of Patients	Quality Health Patient Satisfaction Report	The responsiveness score provided is an average of all categories applied to Patient Satisfaction questionnaires answered by BMI Healthcare inpatients.	2015 - 2016
Number of admissions risk assessed for VTE	CQUIN Data	BMI Healthcare only collects this information currently for NHS patients.	January 2016 – December 2016
Number/Rate of Patient Safety Incidents reported	BMI Healthcare Risk Management System*	Based upon Clinical Incidents with a patient involved where the NPSA Guidelines deem a severity applicable.	October 2015 – September 2016
Number/Rate of Patient Safety Incidents reported (Severe or Death)	BMI Healthcare Risk Management System*	Based upon Clinical Incidents with a patient involved where the NPSA Guidelines deem a severity applicable.	October 2015 – September 2016

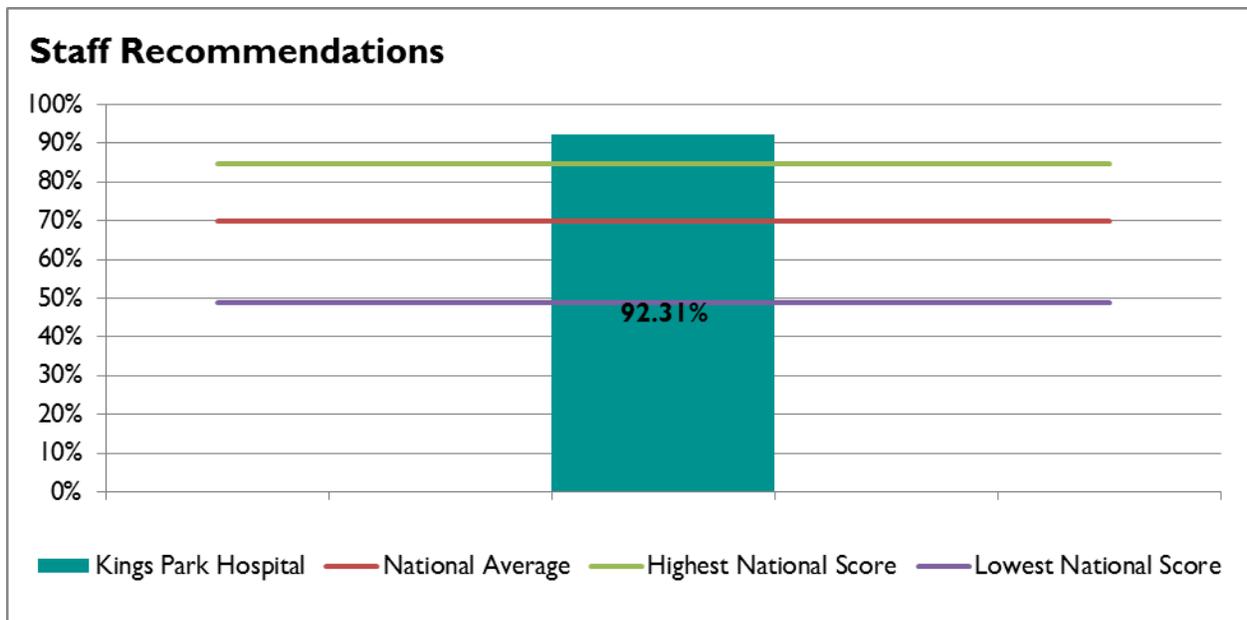

*In December 2016, BMI Healthcare changed Risk Management System. As a result, this data is taken from 2 separate sources. April – November 2016 from Sentinel, December 2016 to March 2017 from RiskMan.

Re-Admissions within 28 Days of Discharge (Paedatric and Adult)

Kings Park does not provide a pediatric service. The adult data for re-admissions is contained in the graph below. There is no data available for 2017.

Staff Recommendation Results

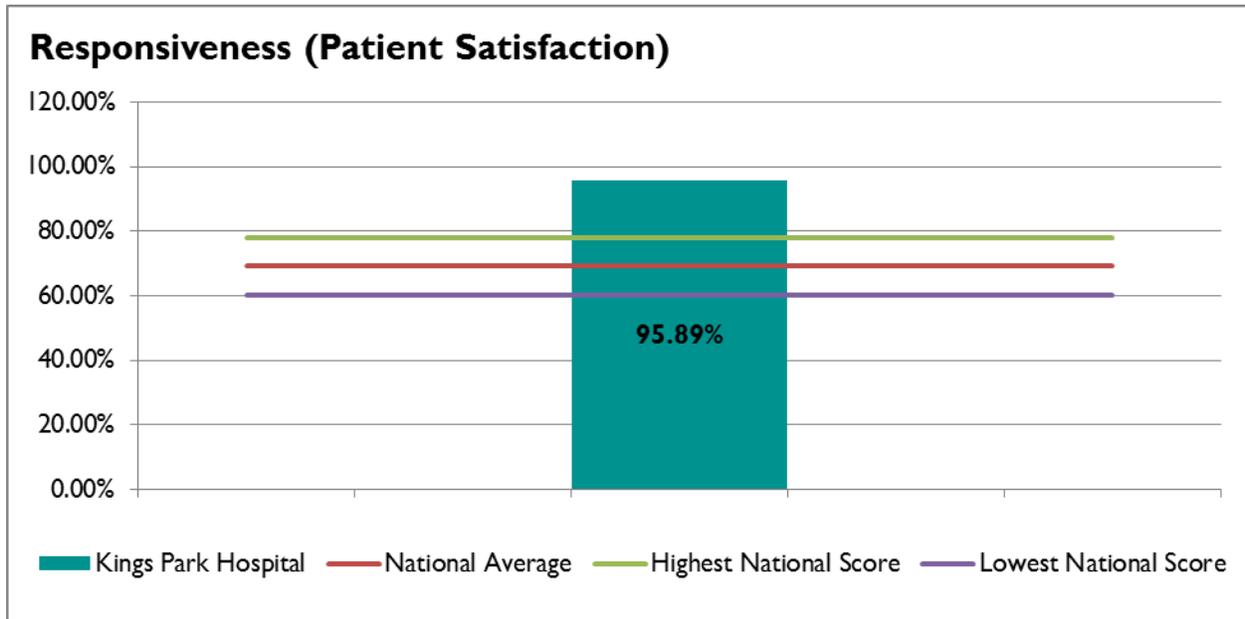

Kings Park Hospital considers that this data is as described for the following reasons:
 Overall staff are happy working at Kings Park and gain extensive training and support
 There have been significant changes in the operating model of the hospital over the past 2 years with some changes in key personnel. The Executive Director has implemented an action plan which has been

successful in improving communication and a sense of ownership and involvement of all staff throughout the hospital.

The rate per 100,000 bed days of cases of C difficile infection reported within the hospital

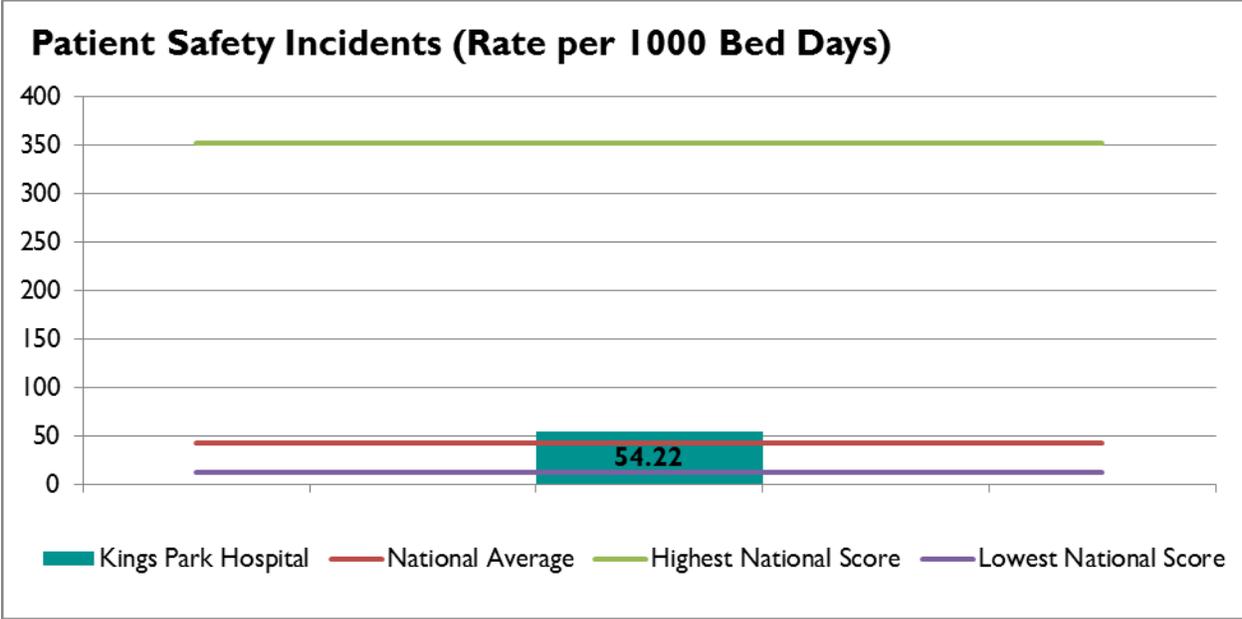

Kings Park Hospital has had 0 cases per 100,000 bed days of C difficile infection reported within the hospital.

Hospitals responsiveness to the personal needs of its patients

Kings Park Hospital score of 95.89% is above the national average and confirms that as a Hospital we are responsive to our patient’s needs. However we continue to strive to improve this by developing and implementing action plans using “you said ... we did” to ensure we continue to drive further quality improvements and increase patient satisfaction.

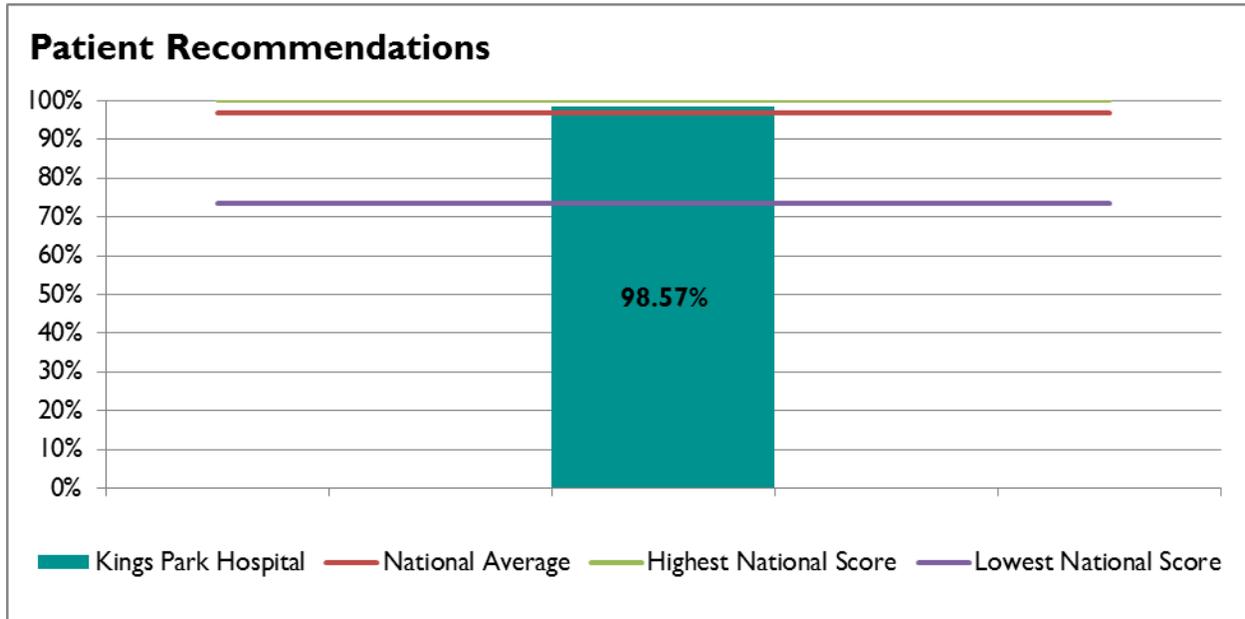

Patient Safety Incidents

Kings Park Hospital rate of patient safety incidents per 1000 bed days is in line with the national average and significantly lower than the highest national score. A robust clinical governance strategy is in place to ensure we take all appropriate required actions to maintain patient safety.

Further Quality Indicators

Patient Recommendation Results

98.57% of patients would recommend Kings Park Hospital. This is slightly higher than the national average.
